# Elemental

Elemental focuses on de-cluttering and creating a home environment that is minimalist with a calming and inviting atmosphere. Elemental takes inspiration from the elements and the essential things in life. Creating that elemental feel within the home has never been easier. Open fires and scented candles are the perfect accessories to complement warming paired back interiors that are simplistic but instantly create a homely feel. The Elemental colour palette is timeless; pastel and plaster pink neutrals dominate this palette combined with complementary accents of warm and cool greys and charcoal tones. Together these tones create a soft earthy palette that radiates comfort and stability within the home.

## Glamorous Times

Glamorous Times is a winter inspired trend that radiates style, elegance and glamour. Geometric patterned prints, textiles and furniture are key pieces for this winter story and are inspired by Viennese Modernism and Art Deco. Combine these patterns with Shimmering metallics and plush velvets to add a touch of softness. Taking inspiration from Viennese Modernism and Art Deco, the Glamorous Times palette has a high contrast colour theme made up of black and off-white monochrome contrasts, rich jewel tones of ruby, sapphire and emerald, to soft pastel tonal shades that will harmonise the look and create refined and elegant home interiors.
